

POLY BRAID MIX 6 – 3.5MM, 400M ROLL PLUS 150M BONUS

Poly braid is a heavy-duty electric fencing conductor engineered for superior power transfer in long runs of electric fencing and demanding conditions. The Nemtek Poly Braid features a tight braided design that enhances durability of the electric fence wires and resists abrasion and UV wear, maintaining conductor integrity for longer service life. The six mixed-metal conductors and a tensile strength of 134kg provide exceptional conductivity, reducing voltage drop over distance – ideal for medium to long fences or multi-strand systems.

Features:

- Ideal for use on medium to longer permanent or temporary fences
- Braided construction for a longer lifespan
- Durable design with a reinforced structure increases the lifespan of the electric fence wire
- Mixed metals for higher electrical conductivity
- Easier to collect when the system needs to be portable
- Blue and white for higher visibility for the animals

Specifications:

Material	UV stabilised
Diameter	3.5mm
Roll size	400m plus 150m bonus
Conductors	6 stainless steel and highly conductive strands
Colour	Blue and White
Max distance	Up to 5km in optimal conditions
Resistance	154 Ohms/km
Strength	134kg (±10%)
